

Environmental Policy

Rockwood Composites recognise that our operations have an effect on the local, regional and global environment.

As a consequence of this, the management and staff aim to understand these impacts, and seek solutions to minimise the effects of its activities, within financial, technical and operational constraints so as to ensure continual improvements in our environmental performance and the prevention of pollution.

The company will continually work towards reducing our energy use.

The company will try to use, wherever possible, environmentally safe and sustainable energy sources to meet our needs and we will invest, where possible or applicable, in improved energy efficiency of the products that we manufacture.

This policy will be reviewed and updated on an annual basis to ensure its effectiveness and will be made available to all employees and the public.

A handwritten signature in black ink, consisting of several overlapping loops and lines, positioned above the name and title of the signatory.
